Overall dimensions	70"L x 36"W x 56"H	89"L x 67"W x 62"H
Shipping weight	990 lbs.	1500 lbs.

AUTOMATIC CENTERSEAL "L" SEALER SYSTEM

The Pro Pack Automatic "L" Sealer System offers distinct advantages over other automatic systems: high quality construction, competitive pricing.

MOTORIZED CENTER SEAL

No handle adjustment required. Seal head automatically raises or lowers with a turn of the switch.

ADVANTAGE OF CENTER SEAL

If package height is more than 3 inches, the seal device adjusts to save between 2 to 3 inches of film width. This results in a huge saving on film costs.

PNEUMATIC FOUR POST "L" SEALER (PPG 2529 FA)

The "L" sealer bar comes down parallel to the sealing surface, not on an angle (cantilever) like the traditional machines. Thanks to this feature the seal is more uniform and stronger, especially for tall packages.

FEATURES

- Dual belt conveyor for efficient product transfer
- Automatic film advance for continuous wrapping
- "Tail" film advance capability
- Film perforators included
- Enhanced safety systems
- Dual photocells for either horizontal or vertical product sensing
- Easy product set-up and change-over
- Easy adjustment for product heights
- Teflon sprayed aluminum hot knife sealing
- Separate control for vertical and horizontal seal
- Manual sealing option
- Seal timer control
- Compressed air operation
- Motorized film scrap rewind
- Film advance by chains for secure continuous operation
- Easy center folded film load with automatic unroll
- Wheel mounted for easy transport
- "TEARSTRIP" adaptable

Works with any centerfold film (PVC, PE, PPL, PO, OPP, etc)

Warranty

A limited warranty by Pro Pack Group covers each system for a period of one year. Specific details regarding this warranty are available from Pro Pack Group and its authorized distributors.
